PROFESSIONAL SUMMARY

Full Stack Software Developer with extensive experience building and maintaining web applications at enterprise scale. I take a hands-on approach across the full stack — front-end, back-end, and DevOps — including ownership of production deployments and CI/CD pipelines. I take my work seriously and bring full commitment to every project I'm part of, making sure things are done right and on time. I enjoy collaborating in agile teams and thrive in environments where quality and reliability matter.

PROFESSIONAL EXPERIENCE

Full Stack Developer

2021 - Present

We Plan S.A.

Development and maintenance of web applications for large-scale telecommunications service clients.

- Front-end development using React and TypeScript
- Back-end development with Node.js, Express, NestJS, and GraphQL
- SQL database design and management
- Legacy code maintenance and migration to modern architectures
- Bug fixing and incident resolution
- DevOps responsibilities including infrastructure management and deployment automation
- Ownership of production deployments during night shifts, including rollback procedures and system stability
- CI/CD pipeline design and management with Jenkins: automated build triggers, multi-stage pipelines, and deployment orchestration across dev, QA, and production
- Container orchestration with OpenShift: managing pods, services, routes, and config maps for microservices-based architectures
- Code quality enforcement using SonarQube
- Version control with Git on Bitbucket
- Ticket management and tracking in Jira

Marketing and Sales

2020 - 2021

Polytech S.A.

- Customer service and hardware component sales
- Market metrics evaluation and digital marketing management
- Technical and commercial assistance to clients
- Procurement and inventory management

Backend Developer

2019 - 2020

Exisoft S.A.

Development, analysis, and maintenance of services for large-scale banking data archival systems.

- ESB service development using IBM Integration Bus 10
- Implementation of SOAP and REST messaging protocols
- SQL database management and Stored Procedures development
- Backend service development with Java
- Service documentation and technical analysis
- Ticket management in Jira

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, C++, C#, SQL, Dart

Front-End: React

Back-End: Spring Boot, NestJS, Express, .NET, GraphQL

Databases: SQL, MongoDB

Testing & Quality: Jest, Veracode, SonarQube

DevOps & Cloud: Jenkins, OpenShift, Docker, AWS EC2

EDUCATION

Universidad Tecnologica Nacional (UTN)

Systems Engineering (in progress)

Escuela Tecnica N-1 Ing. Otto Krause

Technical Degree in Computing

LANGUAGES

Spanish: Native

English: B2 - Upper Intermediate
